

Energy Fund

Role in support for efuel production & use for shipping

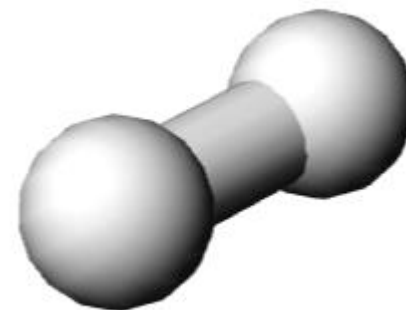

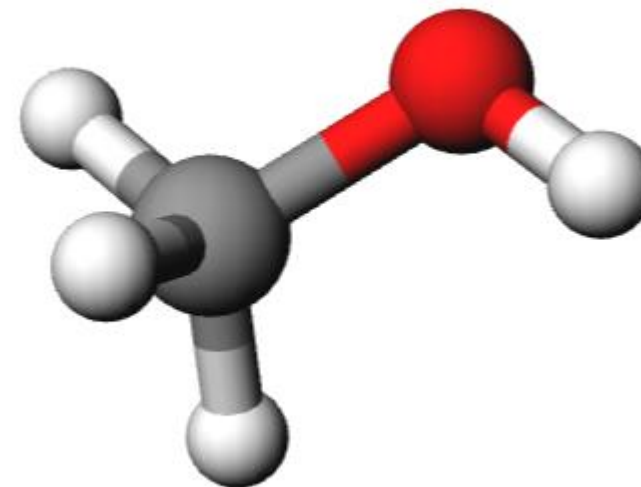

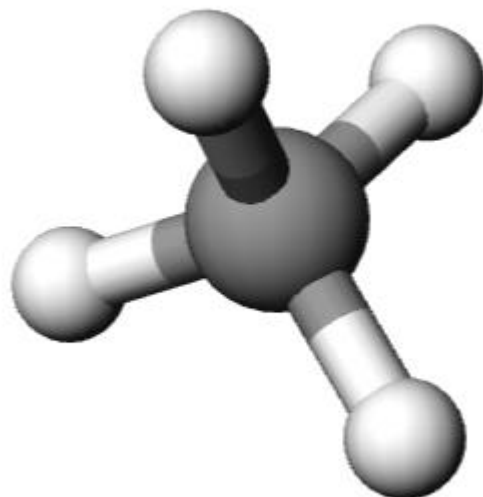

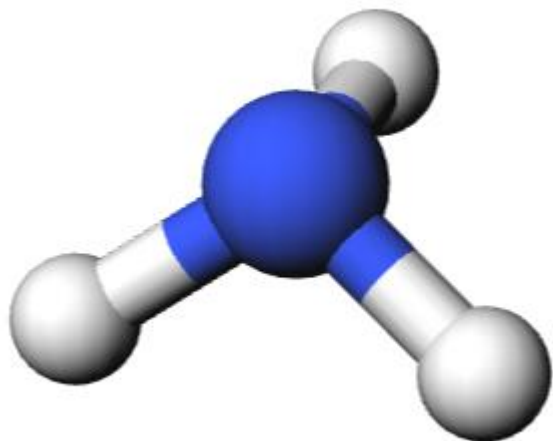

Ragnar K. Ásmundsson, PhD physics
Manager, Orkusjóður (Energy Fund)

Future Fuels for Shipping
Nordic Roadmap
Reykjavík Workshop

Growing fund, currently mostly land transport

What to pick?

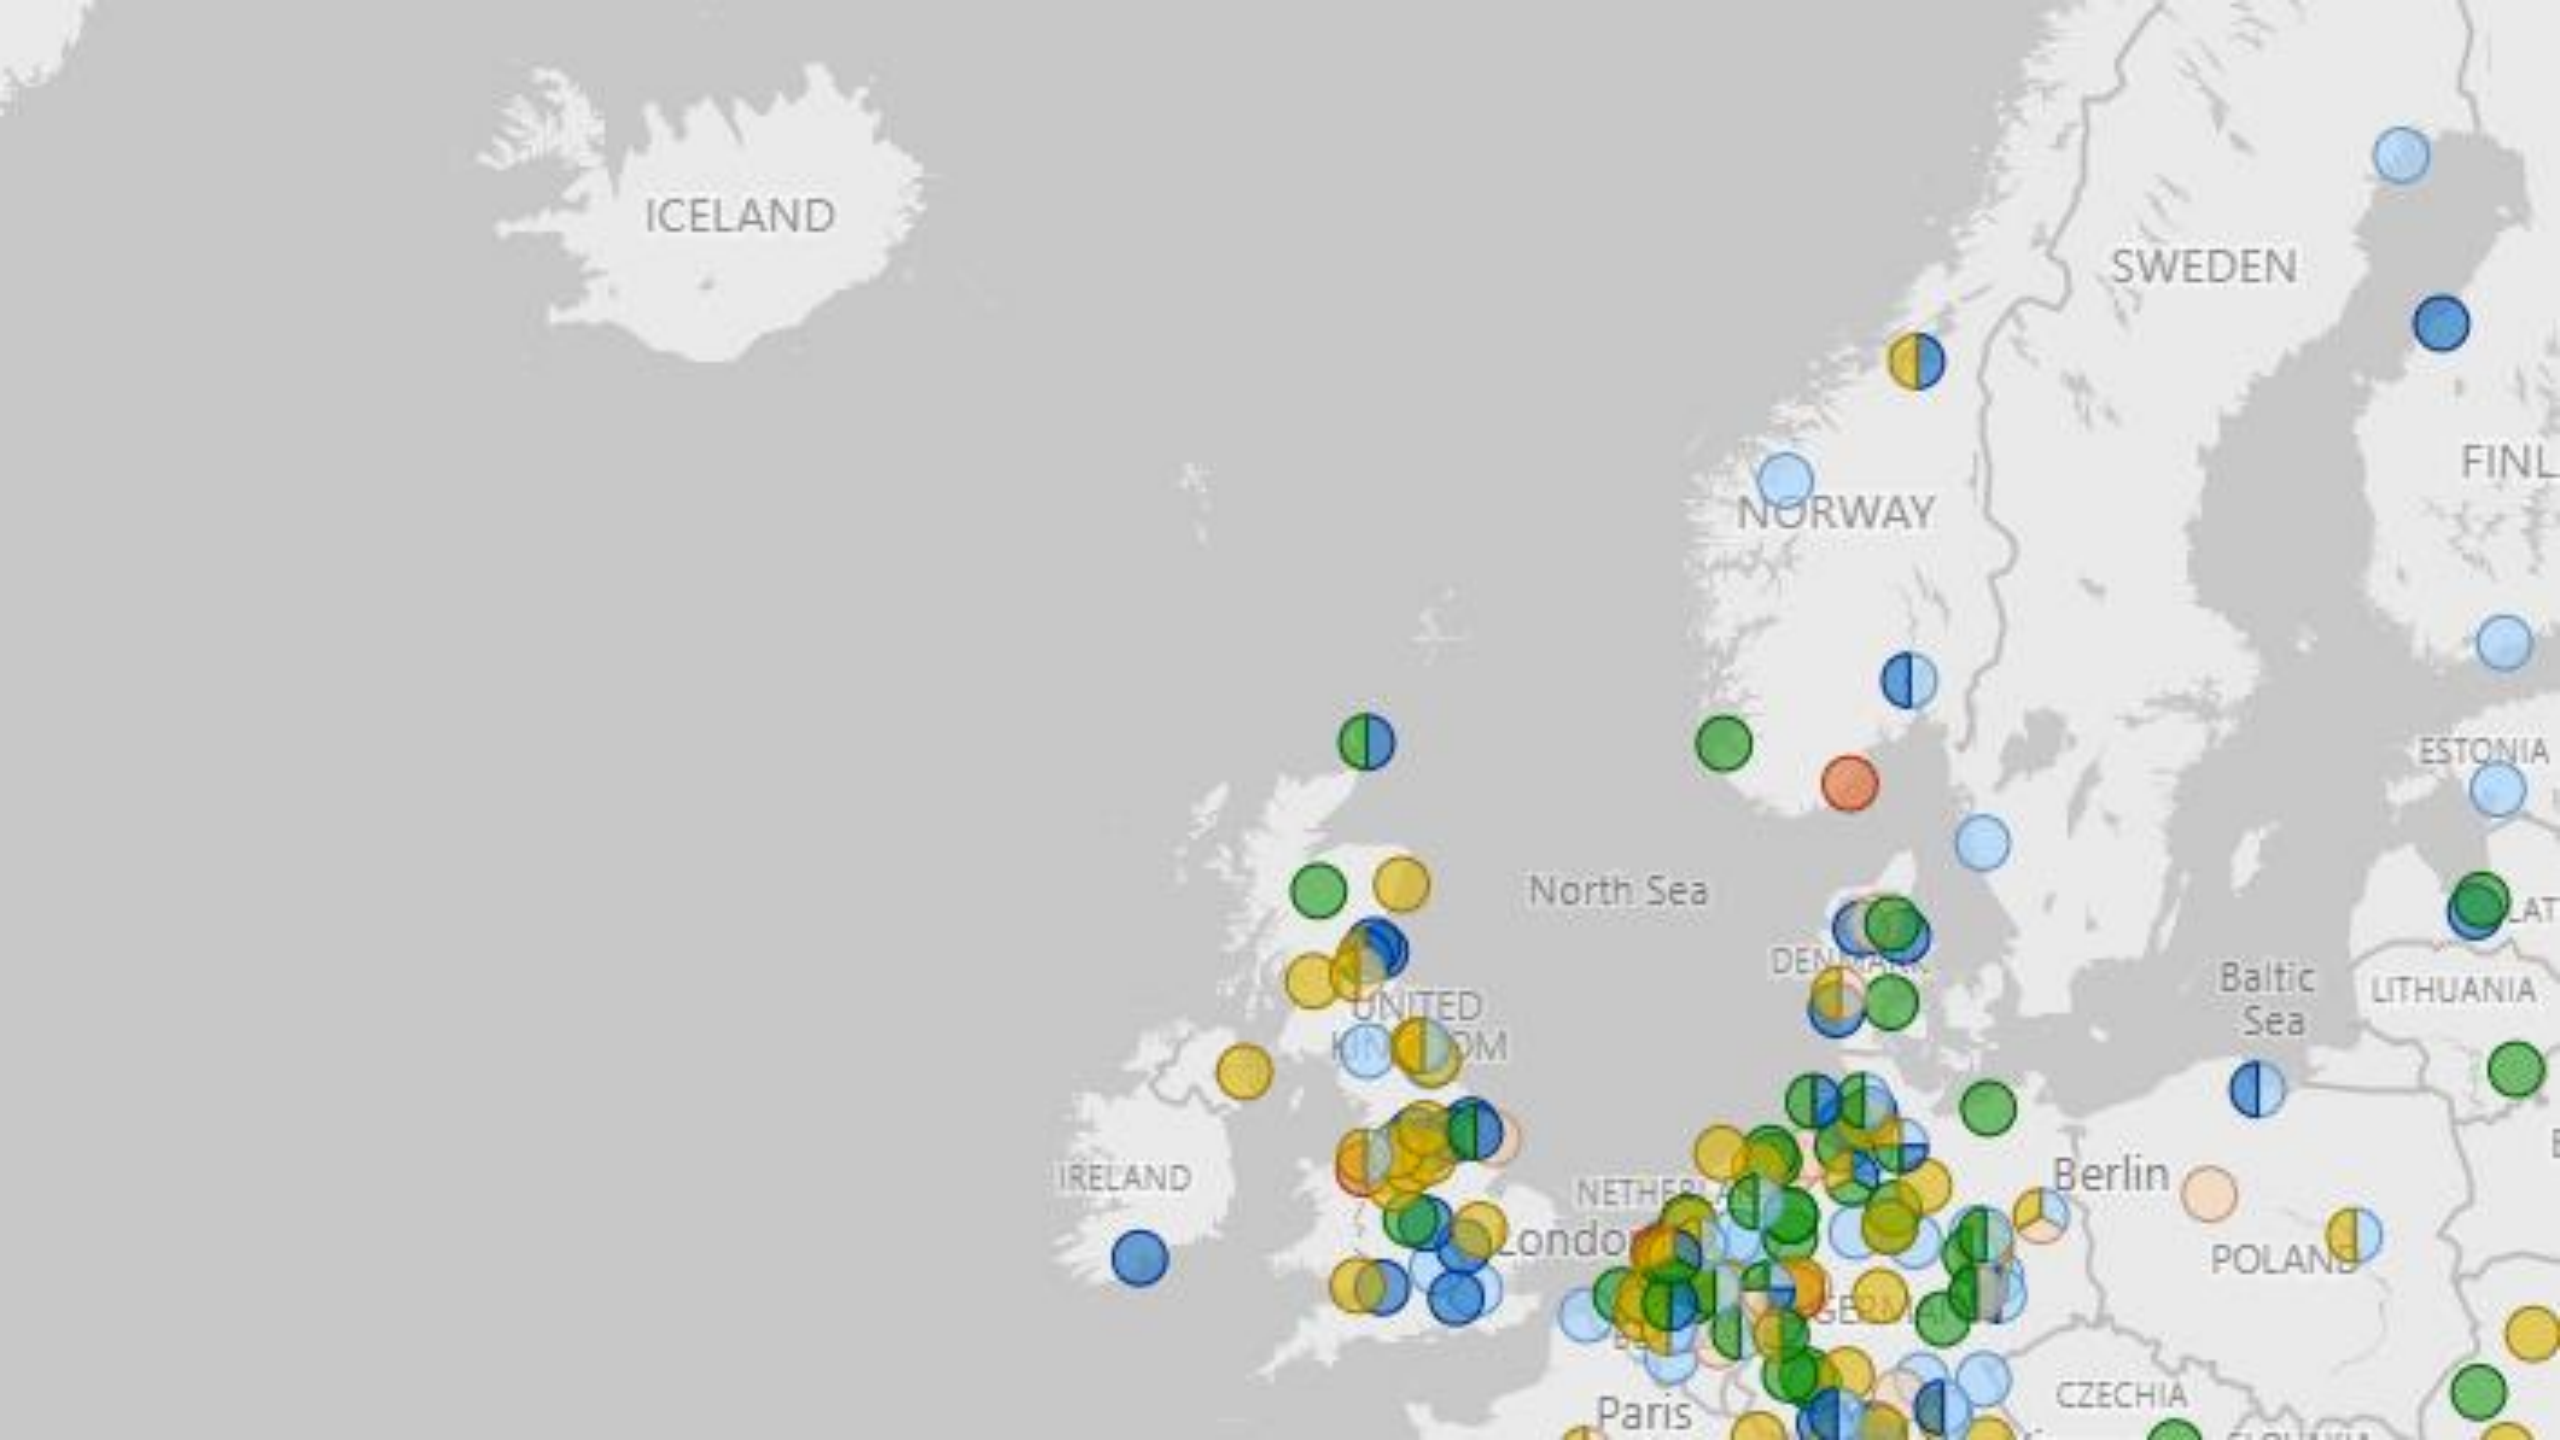

Two marine examples from this year

Project owner	Description
Samherji Ísland ehf.	Use ammonia as fuel on existing fishing vessel
Arnarlax ehf.	Hybrid workboat, using electricity and diesel

Most popular now....?

- DNV report with „rainbow result“
- Analysis of carbon availability – depends on several future options
- CRI can produce if source available – some others potentially also
- Hydrogen production
- Ammonia

LORAN M-12-G
