# The clock is ticking on decarbonization

Targets are set

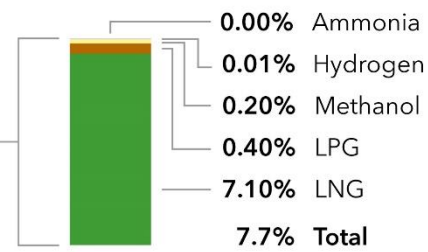

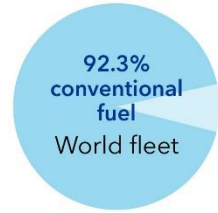

Regulations are being  
developed

**With focus on 2030: Green corridors are key to testing and scaling  
decarbonization technologies**

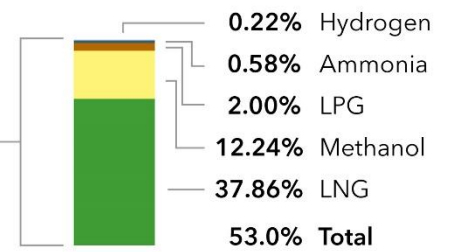

# 92% of the global fleet still running on conventional fuels

## GROSS TONNAGE

Ships in operation

Ships on order

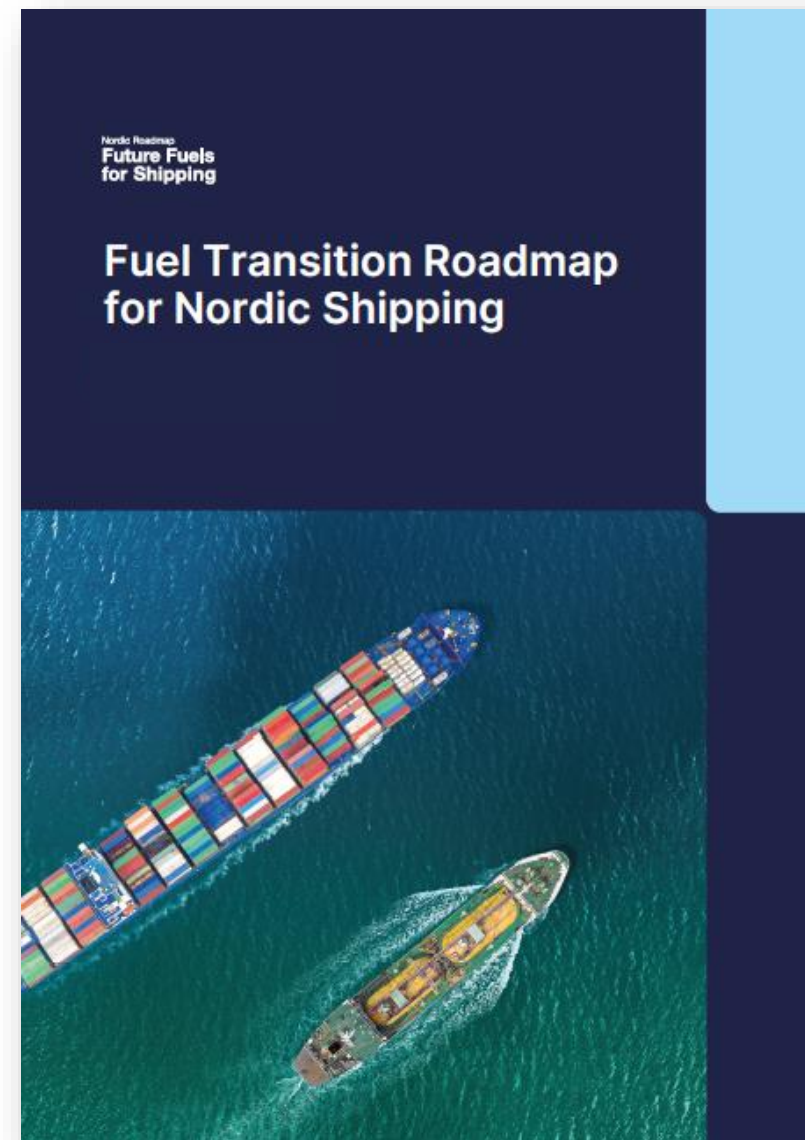

Growth of the number of ships capable of using selected alternative fuels, excluding LNG carriers

# Accelerating maritime decarbonization

- **Unified strategy** to accelerate the fuel transition
- Strong **focus on safety**
- The strategy identifies:
  - **3 key barriers** to the uptake of zero-emissions fuels
  - **20 specific actions** to overcome the key barriers
  - The **key role of Nordic governments**

**Without urgent action  
decarbonization will stall!**

- ▶ • **Implementation is crucial**
  - Closing the cost gap
  - Competitive tenders for green corridors
- ▶ • Provide **confidence for the industry** to invest
- ▶ • **Nordics can lead the way** - value creation and boosted exports

*“This is not the end. It is not even the beginning of the end. But it is, perhaps, the end of the beginning.”*
